The Fund returned +0.44% in April vs +0.44% for the TSX Total Return.

Starwood Capital Group closed its going private transaction of Milestone Apartments Real Estate Investment Trust (MST CN) in an all-cash \$2.85 billion USD deal in April. Milestone was the largest REIT listed on the TSX focussed solely on the US multifamily sector with more than 50,000 apartment units in 16 major markets in the Southeast and Southwest United States. The Fund took a position in late March and at the time of investment this equated to a ~8% annualized return to the end of April.

We have seen increased activity in subscription receipts to start Q2 with a number of companies using this made-in-Canada form of equity issuance that is contingent on a successful acquisition. The fund is opportunistically deploying into attractive spreads related to this strategy and currently has a 20% weighting across a number of positions.

Regards,

Dave Heden & Sean Kallir

Inception June 12, 2013

^{***} S&P/TSX Comp Total Return Index - The TSX Total Return Index is a widely-known equity index of Canadian large-cap companies. Investing in US and Canadian equities long and short is the primary strategy for HGC as part of the merger arbitrage strategy but HGC does not invest in all or necessarily any of the securities that compose the market indexes. Reference to the indexes does not imply that HGC will achieve returns similar to the indexes

^{***} Hedge Fund Research Inc.: Merger Arbitrage Index – Global index of investment managers that use merger arbitrage as a primary strategy. Performance is subject to minor variances due to independent Manager trailing reporting.

Duration & Liquidity is calculated without including SPAC positions
