The HGC Arbitrage Fund LP Class “F” units returned +1.28% in July vs +1.15% for the TSX Total Return.

As we mentioned back in our March update, the Fund has been opportunistically investing in M&A transactions in the cannabis space. We have seen these deals trade quite wide, both due to the difficulty of borrowing the acquirer’s stock to set the spread, and the fact that certain funds are unable to participate in cannabis transactions.

Once again Aurora Cannabis (ACB.TSX) was in acquisition mode and completed its purchase of MedReleaf Corp. (LEAF.TSX) in July. This friendly all-stock transaction was valued at more than \$2.5 billion and firmly established Aurora as an industry leader with more than 1,200 employees. In spite of the expensive borrow rates, the Fund was able to capture an excellent rate of return and this deal was a solid contributor to the profits in the month.

Regards,

Sean Kallir
