The HGC Arbitrage Fund LP Class "F" units returned +0.67% in March vs -0.16% for the TSX Total Return.

A source of gains in the period was the successful completion of Aurora Cannabis' (ACB.TSX) purchase of CanniMed Therapeutics (CMED.TSX). Post a hostile attempt and tense takeover battle by Aurora for the smaller producer CMED in late 2017, a friendly stock-and-cash transaction valued at approximately \$1.1 billion was announced on January 24, 2018. HGC began investing in the position once the definitive merger agreement was in place. The geographical nature and size of this transaction was optimal from an investment perspective. Additionally, the lack of ability for certain Institutions to invest due to the nature of the business being cannabis, was a contributing factor to the spread trading much wider and ultimately more profitable than it would have been based solely on the fundamentals of the deal in another sector.

Regards,

Sean Kallir

 *** S&P/TSX Comp Total Return Index - The TSX Total Return Index is a widely-known equity index of Canadian large-cap companies. Investing in US and Canadian equities long and short is the primary strategy for HGC as part of the merger arbitrage strategy but HGC does not invest in all or necessarily any of the securities that compose the market indexes. Reference to the indexes does not imply that HGC will achieve returns similar to the indexes."
 **** Hedge Fund Research Inc. : Merger Arbitrage Index - Performance is subject to minor variances due to independent Manager trailing reporting
