The HGC Arbitrage Fund LP Class "F" units returned +0.14% in December vs -5.40% for the TSX Total Return.

December was a very volatile period for broader markets, and certainly the most volatile month since the Fund's inception. With the S&P down -14.82% at the lows before recovering to close down -9.18% for the month, the December sell off took no prisoners with almost all risk assets across equity and credit markets feeling the pain. All that being said we were very pleased with the Fund's performance during the month, with the portfolio holding in quite well.

While the SPAC book was relatively calm throughout the month, we did see some motivated selling in a few names which provided the Fund a nice opportunity to buy these issuers at attractive spreads. Outside of the selling, the SPAC portfolio held relatively flat on an IRR basis with nominal spreads narrowing during the month.

Looking back on 2018, we are happy with how both the Merger Arb and SPAC portions of the portfolio performed and we are looking forward to the year ahead.

Regards,

Sean Kallir

*** S&P/TSX Comp Total Return Index - The TSX Total Return Index is a widely-known equity index of Canadian large-cap companies. Investing in US and Canadian equities long and short is the primary strategy for HGC as part of the merger arbitrage strategy but HGC does not invest in all or necessarily any of the securities that compose the market indexes. Reference to the indexes does not imply that HGC will achieve returns similar to the indexes.

**** Hedge Fund Research Inc. : Merger Arbitrage Index - Performance is subject to minor variances due to independent Manager trailing reporting

++ Duration is calculated without including SPAC positions
